

# R290 Safety Development Kit

## Components:

- 2 x Ultrasonic Measurement Module
- Laptop
- 3x USB – Modbus Converter
- USB - LIN / 0-10V / PWM Converter
- GUI
- Pump control output: LIN / 0 – 10V / PWM
- MODBUS Output – selectable from GUI which values to be sent
- Parameter settings:
  - The Pump can be controlled in function of each of these value (the influence can be set in percentage)
- Charts with:
  - Inlet/Outlet Flow, Bubbles, Pressure etc.
  - Delta Bubbles, Pressure, Temperature etc.
